**12. Key qualifications (relevant to the programme):**

My competence is regarding "Animals Welfare during Transport".

In this field, I have given my availability in a lot of training activities on Animals Welfare mainly for EU Member States under the "BETTER TRAINING for SAFER FOOD" initiative.

The EU has had legislation on animal welfare during transport since 1977. The legislation was last revised through Council Regulation (EC) No 1/2005, extending the scope of the requirements to operations relating to transport, such as the handling of animals at assembly centres or in slaughterhouses.

Training in the areas of animal welfare issues is considered an important tool in view of developing best practices and compliance with the EU and international standards.

The subjects that I can develop in the frame of Animals Welfare during Transport are finalized to train all the stakeholders about:

- the interpretation of relevant EU legislation and international framework (as the OIE guidelines);
- the check transport conditions and records (fitness for transport, vehicle standards, space allowances, temperatures, travelling time limits, tachographs and navigation systems etc.);
- the management of practical aspects of handling of animals (loading and unloading activities) and emergency care for animals during transport;
- the assessment the design of vehicles facilities (density, drinking devices, headroom, ramps of access, stalls when required, etc...);

**13. Specific country experience:**
